

A bag of chile is put in a bag Friday at the Leyendecker Plant Science Research Center. Some experts are predicting that problems for this year's crop with weather and drought may translate into higher retail prices. (Norm Dettlaff/Sun-News)

Chile pods grow Tuesday in a field off of West Picacho Avenue near Picacho Hills Drive. In spite of the weather-related problems early on in the growing season, the chile crop has bounced back, according to some experts. (Norm Dettlaff/Sun-News)
